For Immediate Delivery

Introducing the Hyspeco Hypak

- Easy to Order
- Easy to Configure
- Design Flexibility for Varying Applications
- Easy to Maintain
- Heavy Duty Design
- Parker Pumps and Filtration
- Two Model Options in Three Different Sizes

HYSPECO

HYDRAULICS

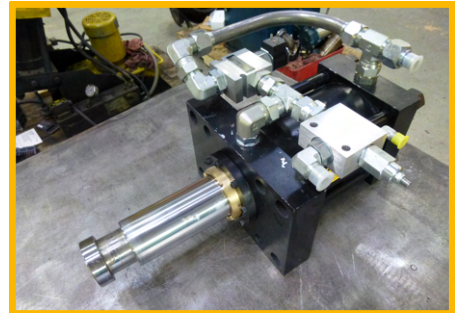

Training

Basic and Advanced Hydraulic Training for professionals who want to learn the standard principle of hydraulics and better understand how to service, diagnose, repair, and build hydraulic-based equipment/systems. ***Fees Apply**

In-House Fabrication

- Hydraulic Power Units
- Manifold Assemblies
- Hydraulic Tube Assemblies
- Custom Cylinder/Valve Assemblies
- Pump/Motor Assemblies
- Hydraulic Filter-Build Program
- Control Systems
- System Data Logging
- Up to 200HP HPU Testing

Aerospace Ground Support Equipment

Hyspeco has been designing and fabricating custom aircraft ground support hydraulic and pneumatic equipment for many years. Our custom-built systems are currently in use in both commercial and military applications throughout the world, and our engineering and fabrication teams work diligently to provide reliable and high-quality designs to meet our customers' specific needs.

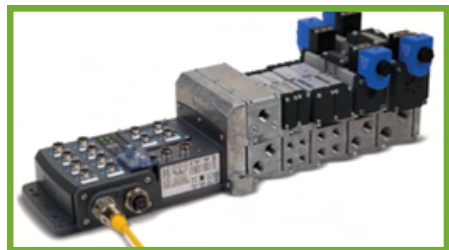

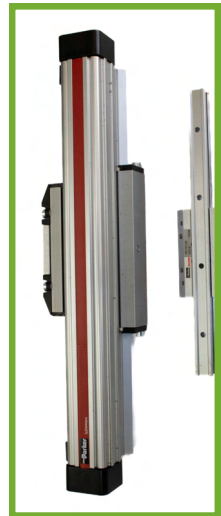

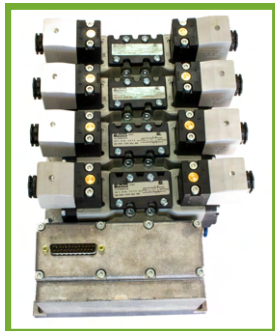

PNEUMATICS

Hyspeco is a Parker “Tier One” Pneumatic Technology Center with products and specialists ready to help design systems or choose the best options for your application.

- Air Logic
- Air Prep (FRL's)
- Cylinders/Actuators
- Fittings & Tubing
- Proportional Pneumatics
- Vacuum Cups & Generators
- Valves - In-line and Manifolds

HOSES & FITTINGS

As a certified Parker Connectors Technology Center, Hyspeco delivers expertise across the complete line of Parker Fluid Connector products, including Hoses and Industrial Hoses, Quick Couplings, Adapters, Clamps, Tube Fitting, and Parflex product lines. Producing over 130,000 hoses a year, we are your expert go-to source for hose assemblies.

Hydraulic Hose Assemblies

As a Parker Hannifin distributor, Parker hose assemblies offer confidence, ease, and reliability in convenient and popular configurations for common transfer applications. With the most comprehensive range of hydraulic hose assemblies on the market, we have the capability to efficiently meet all of our customers' needs. Parker is also a leading manufacturer of rigid and flexible hoses, assemblies, fittings, and crimping technologies that serve a wide range of markets. Our hose assembly solutions offer exceptional chemical compatibility and moisture resistance and can handle high pressures and temperatures. This makes them ideal for use in extreme operating conditions.

Vendor Managed Inventory Programs

Our VMI Specialists assist in building an inventory stock-out system that is proven to reduce on-hand inventory and company overhead. Knowledgeable in industry-related products and logistical efficiency, your Hyspeco specialist will develop a drop-off schedule based on your immediate requirements. Representatives will arrive outfitted to fill your stock demands, check current inventory, relay updates, and drop off custom orders.

On-Site Hose Crimping Equipment Loan Programs

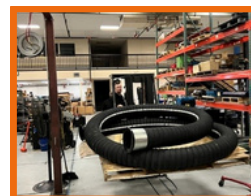

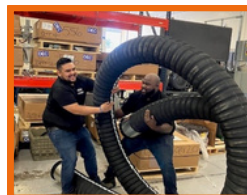

Get a Parker hose crimper to build hydraulic hose assemblies on-site. This program will consolidate inventory, reduce downtime, and save time and money. A hose crimper offers several solutions that can help meet your business productivity demands, reduce costs, and promote employee performance. Hyspeco offers a value calculation to verify the true value of this service.

Industrial Hose

Including:

- Bulk Hose Transfer
- Camlock and Sanitary Fittings
- Petro-Chem Hose
- Sewer Vacuum Cleaning Hose
- Vacuum Truck Hose

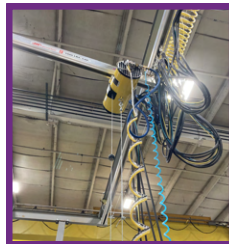

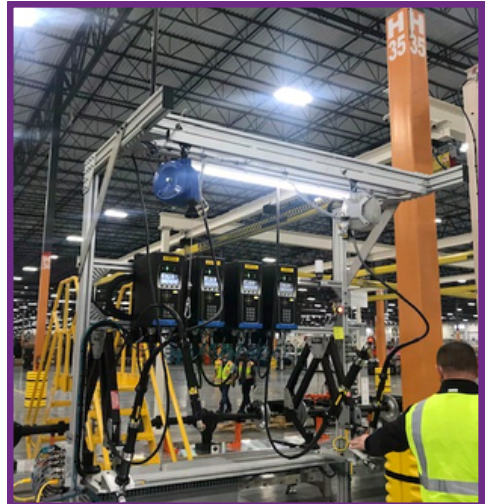

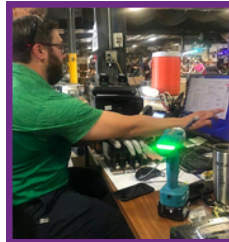

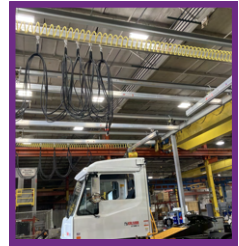

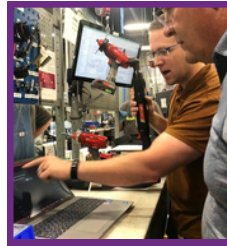

TOOLS & MATERIAL HANDLING

Hyspeco's tool division is pleased to provide our customers with "best-in-class" products and services. Our vision is to earn partners for life! How do we do this? By getting to know our customers and providing the best possible solutions for every requirement.

Hoist Load Testing & Inspections

Hyspeco offers hoist and balancer inspections and load testing services. Our technicians are crane certified to NACB standards for overhead cranes. We also provide load testing to 2 tons capacity. We are a provider of overhead-lifting products including overhead cranes from UESCO, bridge and rail systems, and custom handling devices from both Ingersoll Rand and Gorbel. Additional products provided include fall arrest equipment, jib booms, overhead bridge and rail systems, hoists, balancers, and custom handling devices.

Tool & Torque Wrench Calibrations

Hyspeco is pleased to provide tool calibration services for our customers. We will perform these calibrations at the Tool & Calibration lab inside Hyspeco's Kansas City location or on-site at our customer's facility.

Our shop uses the ISO6789 and ISO5393 calibration methods; these methods provide the highest-level six-sigma testing available. We are also an authorized warranty repair center for Ingersoll Rand tools/hoists and Stanley Assembly Technologies. Hyspeco provides repair services for tools and hoists in our St. Louis, MO and Wichita, KS locations.

TOOLS & MATERIAL HANDLING

Additional products offered for in-plant applications include UNEX rolling racks, shelving systems, gravity conveyors and carts; COGAN mezzanines, cantilever racks, rack guards, guard rail and wire partitions, EB-TECH in-plant buildings, blast and ballistic structures, clean rooms, and guard shacks; Mid States carts, hoppers, and wagons; Quantum storage lockers and parts totes; Mighty Line floor striping products and REFRESH fans.

Hyspeco provides inventory solutions.

Some of the most requested items we are stocking include data collection system wrenches, standard click wrenches, retightening system wrenches, I R QX series tools and QCXD controllers, QXX high torque tools, air screwdrivers and nut-setters, Stanley Assembly Technologies DC Tools and QB series controllers, Stanley battery transducer control tools, air and electric hoists, air and battery impact wrenches, and standard care tools.

Please contact us for more information about Hyspeco Tools, or if you would like us to come visit your facility. We look forward to working with you on your plant requirements.

New Tool Calibration Lab and Training Room in our Kansas City Location

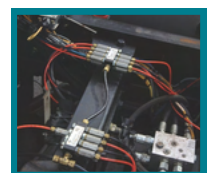

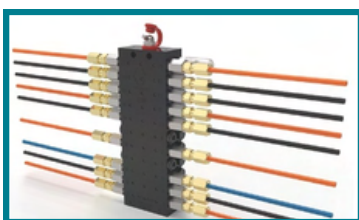

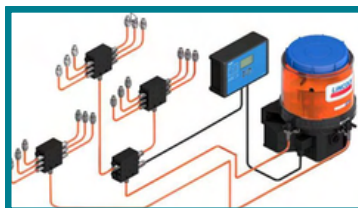

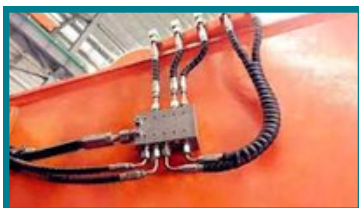

AUTOMATION

- AC Variable Frequency Drives (to 600 HP)
- Ball Screw Actuators
- Belt Drive Actuators
- DC Motor Controllers (to 1950 Amp)
- Gantry Systems
- Linear Motors
- Optical Inspection
- Parker and Beckhoff Control Systems
- Servo Motors
- Single & Multi-Axis Motion Controllers

LUBRICATION SYSTEMS

As a Centralized Lubrication Specialist certified by both Graco and SKF Lincoln, Hyspeco provides both the products and the application assistance required to make your project successful.

MANUFACTURING & KITTING

Hyspeco's light manufacturing and assembly capabilities, including kitting services, are marked by precision and efficiency. With state-of-the-art equipment and skilled technicians, we excel in producing intricate components and assemblies for various industries. Our commitment to quality ensures reliable, cost-effective solutions that meet diverse customer needs.

Kitting/Subassemblies

Our Sub Assembly & Value-Added services allow manufacturers to outsource portions of their manufacturing process. This service is proven to lower overhead, improve efficiency, and decrease stagnant inventory. Hyspeco provides a wide range of manufacturing abilities. We begin by offering consultation of your facility and/or manufacturing process. We then utilize our team to build your product or sub-product and package it into a turnkey kit that arrives at your facility ready to plug into your assembly line.

Tube Bending

Stainless & Carbon Steel seamless material types with multiple end fitting options that include Seal Lock, JIC, Inverted Flare, and more. ****Bending options vary.***

Outside Diameter (OD) sizes range from 3/16" - 1 1/2"

Special tubing O.D., material, and bends are available upon request.

Please contact us for more details.

Custom Manifold Design & Build

Clean up your hydraulic system with a custom-designed manifold that features Parker cartridge valves. Our designs offer cost-saving variables such as less plumbing, a smaller footprint, compact design, and assistance in mobile applications.

REPAIR

Bring your equipment to Hyspeco for hydraulic or pneumatic component evaluation and repair. We understand the importance of limiting downtime. Our goal is to get you back up and running while saving you money.

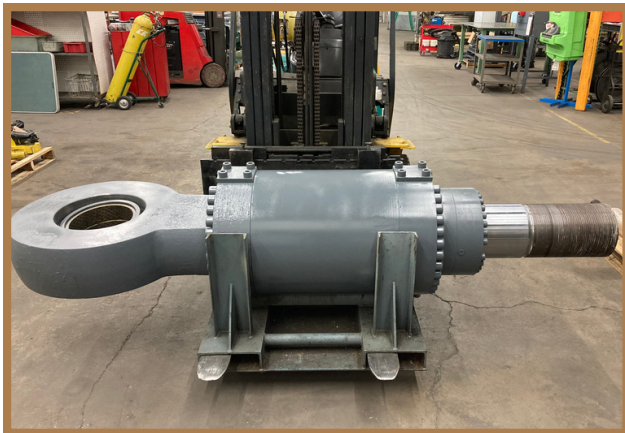

Total Repair Facilities

- Accumulators
- Actuators
- Crimpers
- Cylinders
- Gear Boxes
- Grease Pumps
- Hydraulic Motors
- Hydraulic Power Units
- Valves
- Winches

A Resource Center for Vulnerable Teens

"We at American Pulverizer have had great success with Hyspeco as a supplier of cylinders, power units, and technical expertise for over 20 years. They are an asset when dealing with unknowns associated with the startups of our shredding systems and have always gone beyond the call of duty to get our end users up and operating. Our sales, engineering, and field service people have complete confidence in their workmanship and expertise."

Chris Griesedieck

President of American Pulverizer

"I enjoy working with the Hyspeco team and have enjoyed the relationship we have built over the last few years. The convenience is unmatched and they recently helped another division get up and running with a DC tool setup. That division only had positive things to say about the interaction."

Richard Wells

Plant 93 Fab ENG Supervisor at Altec Industries

Google Reviews

Kevin G.

Very friendly & helpful, great guys! Stopped in needing a hose made & they got me going in no time at all. I would definitely recommend these guys.

Johnny V.

Great service & knowledgeable! Always a go-to place for me when I have hard-to-find fittings! Been coming here for years for misc. fittings for my auto needs.

Conner N.

Friendly & knowledgeable staff. Highest quality hoses & fittings with a great selection in stock, there is no other place in the area to match their quality in hoses.
